ANISHA RAJ

ABOUT ME

I enjoy designing and coding user interfaces that are not only visually stunning but also user-friendly, responsive, and accessible. It's the creative aspect of this work that truly resonates with me. My keen attention to detail leads me to discover and squash UI bugs, ensuring a seamless experience for users. I am a curious person, who is always ready to learn something new. Collaborating with others is another source of inspiration for me, as I believe that the best solutions often emerge through teamwork. Currently, I am dedicating time to the Google UX Design certification course, personal Frontend project and participating in Dash Hack, Junction Hackathon and Mimmitkooda Ultrahack.
